Dear Sir/Madam

Ref: Student Attachment

Muzi Dean Nellou.....is a student at this institution, in the Electrical and Electronic Engineering Division studying for his/her National Certificate/Diploma in Computer Systems.....

While the institution strives to arm the students with practical skills, they still need exposure in the real world of business in their chosen careers. We are inclined to believe that as partners in training your organisation can assist in affording our students the opportunity to be part of your team as interns.

Students are expected to be on Industrial Attachment for a period of 12 months, beginning January 2025. The host organisation may claim training rebates from ZIMDEF.

Students are expected to produce a report at the end of the Industrial Attachment period. This contributes to their end of year continuous assessment component.

Your valuable assistance is greatly appreciated.

Yours faithfully

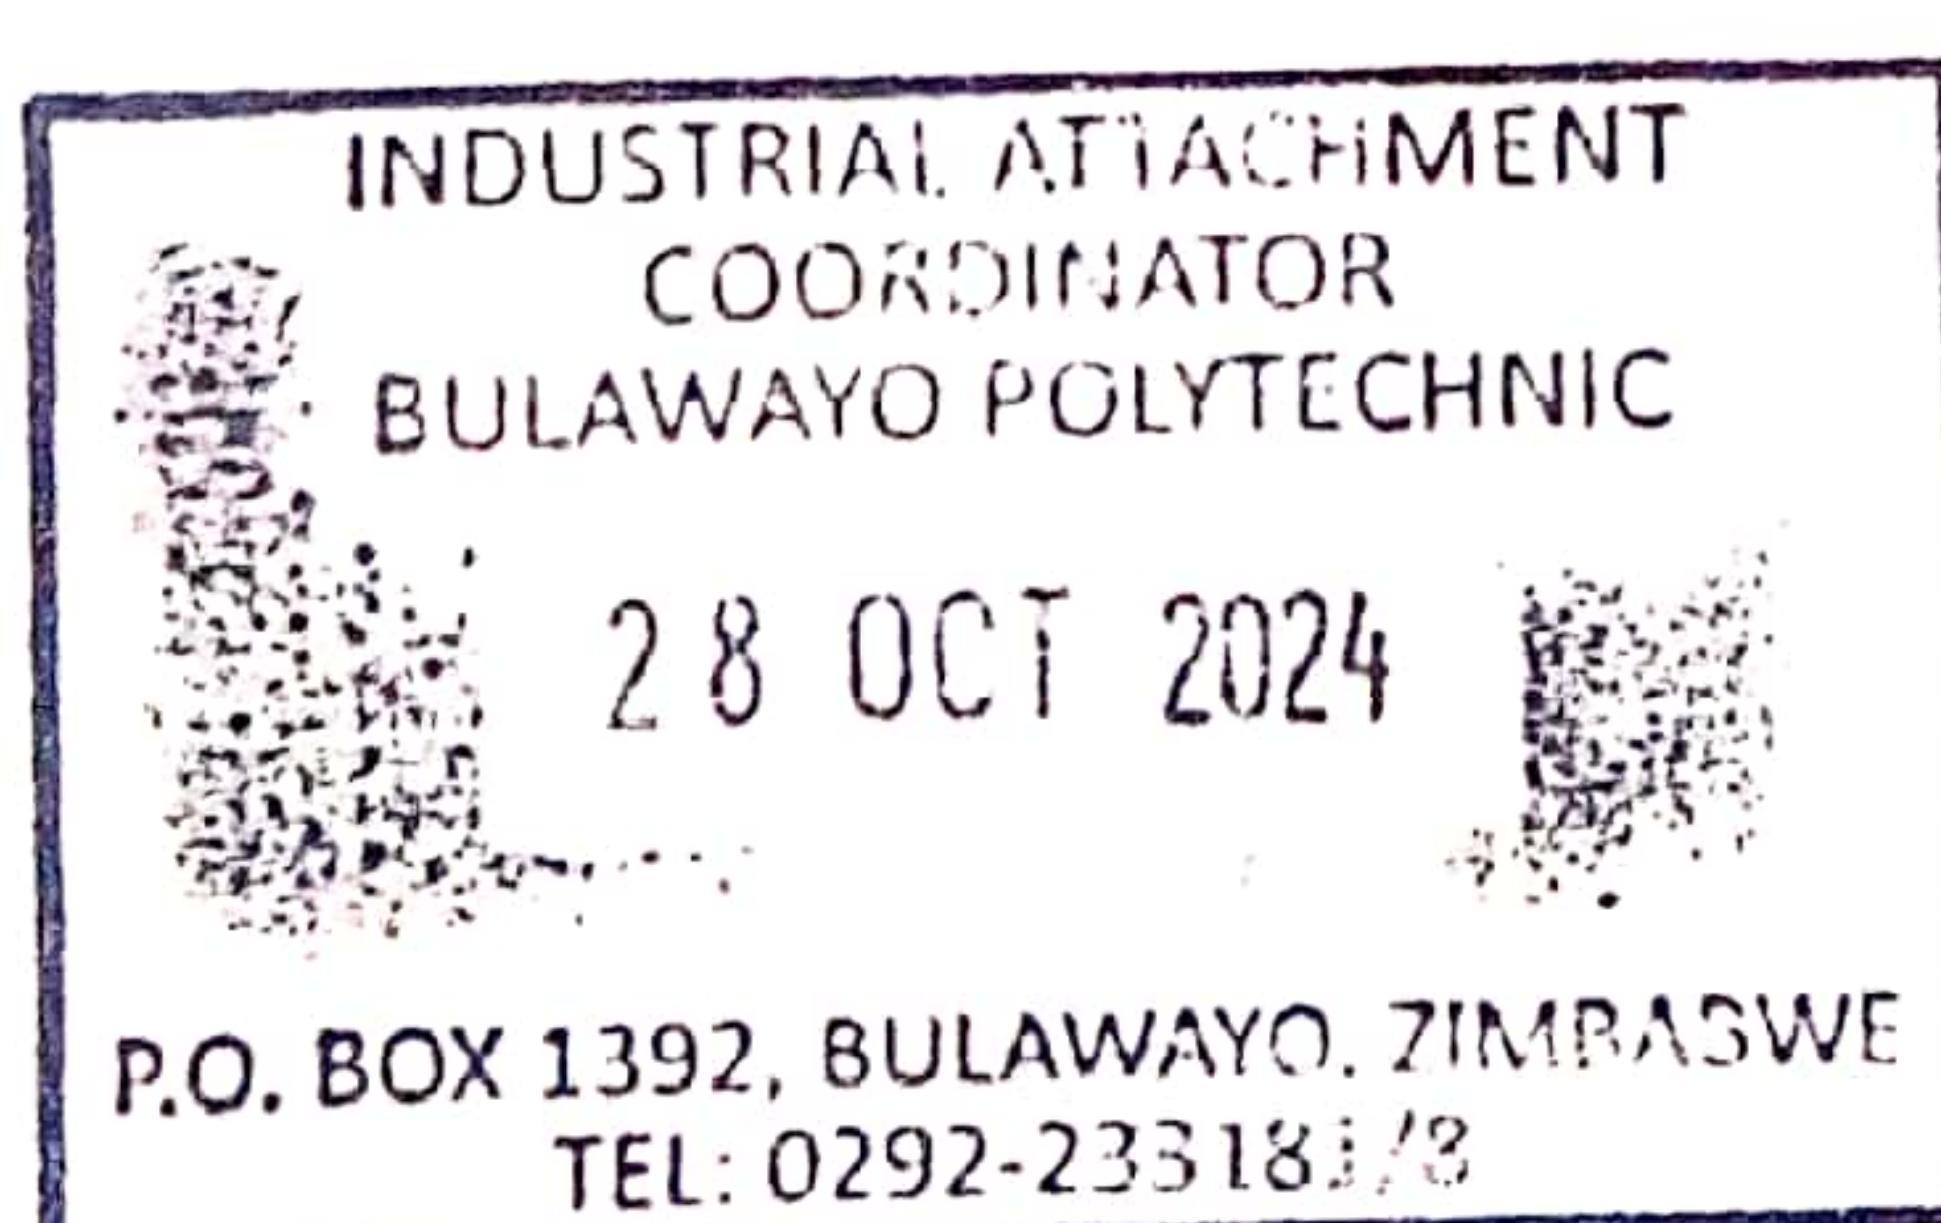

Landa C. C.
